Match Your Needs With Different Types of Rotors and Consumables

Fixed angle rotors:
Ideal for pelleting applications
with 25-45° angles

Thick walled tubes:
Allow extra filling volume

Tubes:
From different materials for
different applications

Special 1.5 mL micro tubes:
Convenient to handle and
spin at up to 200,000 × g
with Micro Tube (C)

Seal tubes:
Heat welded shut to enclose
precious samples

Bottles:
Easy to close and open multiple times

Vertical rotors:
Rapid separation of e.g. nucleic acids

Swing-bucket rotors:
Perfect for density gradient
applications

Neo-angle rotors:
Short sedimentation
distances for fast separations
