VisioNize® Lab Suite & Clustermarket™

Remote asset monitoring and equipment scheduling – all in one place.

Scan this QR code and book a demo with us today!

Remotely monitor your instruments with a vendor – agnostic solution connected to the Clustermarket equipment booking software.

Ensure data compliance, receive alert notifications and prevent sample losses. Get real-time equipment-specific parameters such as temperature, CO_2 concentration and speed, among others.

„We are excited at Eppendorf about this partnership with Clustermarket as it aligns with our belief in open digital ecosystems and the importance of seamless integration between digital tools to provide the best user experience. With near-real-time access to accurate device data combined with advanced equipment management, laboratories are empowered to make more informed decisions and streamline their lab operations like never before. "
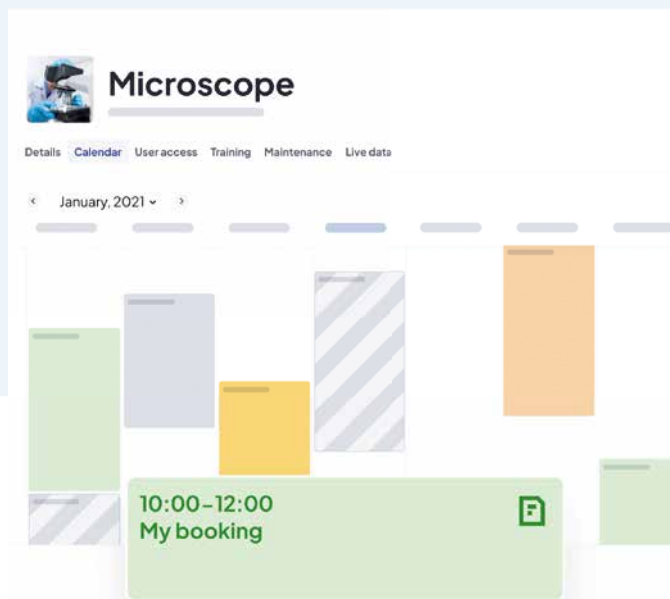

Lynn Philip, Product Leader at Eppendorf.

**Get your real-time parameters!**

Book lab equipment in seconds and plan experiments safely

As a lab manager, Clustermarket helps you make sure scientists get access to the equipment they need and are booking them by your rules. Provide your team with an equipment scheduling system made for scientific laboratories and have everyone on the same page while avoiding scheduling conflicts with a transparent calendar that works with your own rules.

Access live information from your instruments

No matter where you are, check the temperature of your freezer, the CO_2 concentration of your incubator or the speed and remaining run time of your centrifuge. Use the data to improve the quality and reproducibility of your experiments, to get alerts and prevent sample loss, and to monitor ongoing experiments.
