

BioFlo[®] 320

BioFlo 320 Performance Plans

Bioprocess systems include several sophisticated technologies. Peak performance requires smooth interplay of the subsystems and fully functioning consumable parts. Regular maintenance by qualified engineers helps to ensure reliable operation, while deferring it can cause unreliable results, expensive repairs, and prolonged downtime.

The BioFlo 320, next-generation bioprocess control station, is designed as a universal platform capable of meeting the ever changing needs of all segments of biotech

and pharmaceutical sciences. The BioFlo 320 is suitable for microbial and cell culture, scale up and scale down, and batch, fed batch, and perfusion processes. It features an extensive range of glass and BioBLU[®] Single-Use Vessel options (250 mL – 40 L).

Eppendorf Bioprocess Performance Plans help you to maintain the optimal performance of your equipment over years of frequent use.

Bioprocess maintenance — see the advantage!
