A double anniversary: 60 years of Eppendorf Microcentrifuge & Microliter System Revolution!

Scientific research is constantly unlocking new mysteries. But these discoveries often hinge on working with incredibly small volumes - microliters. Eppendorf is the first company that introduced the microliter system in 1964 with the introduction of the microcentrifuge 3200.

Together with the pipettes, microtubes and thermomixer, this toolset is a complete ecosystem designed to work seamlessly together with precision and efficiency in microliter volumes. The year 2024 is indeed a special year for Eppendorf with a double celebration of 60 Years of Centrifugation and 60 years of the Microliter System. An incredible milestones for Eppendorf.

Let us walk you through a series of innovations in our microliter system.

1964 Centrifuge 3200

Completes the Eppendorf Microliter System.

1989 Centrifuge 5415 C

One of the most popular small, lightweight, Eppendorf microcentrifuges still found in many labs today.

2006 Centrifuge 5424

The first microcentrifuge with OptiBowl® design for quiet operations.

2009 Centrifuge 5430 R

The first compact microcentrifuge with high capacity to spin max. speed up to 30,000 x g for 1.5 and 2ml Tubes and with rotors for 15 and 50 ml conicals, and plates.

2023 Centrifuge 5427 R

Our first centrifuge with natural refrigerant (hydrocarbon cooling) - to protect samples and our planet.

1963 The 1st Microtube

The invention allowed small volume handling of samples, becoming a worldwide standard in any labs.

1988 Safe-Lock Tubes

A standard for sample safety to prevent lid pop-up, sample leakage and sample evaporation with a secure lid lock.

2004 DNA/Protein LoBind

Two different low binding tubes that are made specifically for minimizing nucleic acid and protein loss.

2019 Conical Tube 25 mL

A new volume standard was introduced to fill the gap of 15 mL and 50 mL tubes.

2023 BioBased Tubes

The first plastic tube that is made from 2nd generation renewable resources to help you with your sustainability targets.

1961 Marburg Pipette

A new volume standard was introduced to fill the gap of 15 mL and 50 mL tubes.

1978 Multipipette 4780

A first for series pipetting/ dispensing without taking up liquid again with the associated consumable, called Combitips advanced that works accurately even for challenging liquids.

1994 Reference[®] 4910

The first fully autoclavable pipette that is also the first and only one-button pipette that offers safety against cross-contamination.

2020 Move It[®]

This adjustable tip spacing pipette is the first pipette without tubing connections that results in increased precision, durability, autoclavability and easily serviced for long term use.

2025 Something amazing

Another innovation coming in 2025.

A Celebration with Savings

Small volumes, big dreams start with having enough supplies to ensure no interruptions to your next big discovery in the lab.

Research plus 4-Pack (Act Now! Bundle)

Act now to achieve your sustainability targets with this pack to get more savings than buying each one individually.

Benefits of using the epT.I.P.S. BioBased Reloads

- > Sourced from 2nd generation renewable feedstock.
- > Same chemical performance as fossil-based resources.
- > A completely sterile reloading of your tips with the TwinLid® function.
- > Produced without the addition of unnecessary plastic additives.
- > ISCC PLUS certification - traceability along the entire supply chain.
- > ACT certification - sustainability assessment of products used in laboratories.

Description

The Eppendorf Research® plus, 4-Pack Bundle includes:

312300950

- > 1 x Research plus 0.1-2.5 µL, 2-20 µL yellow, 20-200 µL and 100-1,000 µL
- > ep Dualfilter T.I.P.S.® BioBased sterile Reloads with 960 pipette tips of 0.1 – 10 µL M, 2 – 20 µL, 2 – 200 µL and 50 – 1,000 µL
- > 4 x epT.I.P.S.® Box 2.0 (empty)
- > 1 x Eppendorf pipette pen

Research plus Essentials Packs

A starter pack with 6 –pipettes and a whole lot of filter tips /standard tips to give you the mileage you need in your pipetting routines.

Benefits of using the ep Dualfilter T.I.P.S.®

- > Dual filter, dual protection.
- > Comply to ISO 8655 with Research plus pipettes.
- > Certified to EN 29463, an EPA/HEPA Standard.
- > PCR Clean and sterile, ready to use.
- > Filter tip racks use 20 - 35% less plastic material.

Benefits of using the epT.I.P.S.® Standard

- > Packaged in resealable bags.
- > Comply to ISO 8655 with Research plus pipettes.
- > Eppendorf quality, autoclavable.
- > Manufactured with high grade virgin polypropylene.

Scan or click [here](#) to submit your inquiry.

Description

The Research plus 6-Pack Dualfilter Bundle includes:

- > 1 x Research plus 0.1 – 2.5 µL, 0.5 – 10 µL, 2 – 20 µL (yellow), 10 – 100 µL, 20 – 200 µL, 100 – 1,000 µL
- > 1 x Pipette Carousel 2.0
- > 3 x ep Dualfilter T.I.P.S. 0.1 – 10 µL S, 0.1 – 10 µL M, 2 – 20 µL, 2 – 100 µL, 2 – 200 µL and 50 – 1,000 µL
- > 1 x Eppendorf pipette pen

Order no. 2232000168

The Research plus 6-Pack Standard Bundle includes:

- > 1 x Research plus 0.1 – 2.5 µL, 0.5 – 10 µL, 2 – 20 µL (yellow), 10 – 100 µL, 20 – 200 µL, 100 – 1,000 µL
- > 1 x Pipette Carousel 2.0
- > 3 x epT.I.P.S. Standard 0.1 – 10 µL S, 0.1 – 10 µL M, 2 – 200 µL and 50 – 1,000 µL blue tips
- > 6 x epT.I.P.S. Standard 2 – 200 µL, yellow tips
- > 1 x Eppendorf pipette pen

Order no. 2232000169

Research[®] plus Productivity Packs

Working with 96-well plates? The right pipette and tips are crucial for precise, accurate, and comfortable pipetting. This ensures reproducibility in your experiments, making your data from plate assays reliable. We have 4 different volume ranges of 8/12-channel pipettes combined with two options of epT.I.P.S.[®] to choose from.

We Are ISO/IEC 17025 Accredited

Our pipette calibration center at Biopolis is now compliant with ISO/IEC 17025. You can trust us to provide you with the highest level of accuracy and precision when calibrating your pipettes. Pipettes of other brands are also accepted.

From now until 31st December 2024, you are entitled to a 20% OFF for all of our pipette calibration services. We also offer a Pipette Trade-In Program where you get a special price to trade-in your pipettes for the Eppendorf Research® plus single-channel pipettes.

Scan to submit your service/trade-in request.

Celebrating 60 Years of Centrifugation

1964 marks the launch of the first microcentrifuge at Eppendorf completing the famous microlitre system. Ever since then Eppendorf has been developing, producing, and distributing high-quality centrifuges for you with user-friendliness, quality, and longevity as guiding principles. Rely on 60 years of Eppendorf's centrifugation expertise.

Find your perfect fit

You deserve the best laboratory equipment to ensure that your separation tasks run smoothly every time. That's why our goal is to provide optimised solutions for you and your requirements: From microcentrifuges and benchtop centrifuges to high-speed floorstanding- as well as ultracentrifuges, our extensive portfolio now offers comprehensive solutions in the areas of molecular biology, biochemistry and cell biology.

With our now complete centrifuge portfolio we give you the promise of separation at ease, enabling you to focus on what matters most: your research.

Rely on 60 Years of centrifuge expertise.

Check out our complete range of centrifuges and service options including high speed and super speed floor standing as well as ultracentrifuges and micro-ultracentrifuges.

ThermoMixer® C

Why you will love it

Improve your assay results by mixing and incubating samples at the same time. Eppendorf ThermoMixer C has easy-to-exchange SmartBlocks for all common lab vessels, enabling a variety of applications.

Eppendorf ThermoTop®

As soon as the Eppendorf ThermoTop is placed on the device, heating starts. The heating temperature is optimally adapted to the test temperature ensuring optimal sample safety: No way for condensation to form in your sample tube lids.

BONUS **WhatsNext Promotion - Buy a ThermoMixer C with either a 1.5 mL or 2.0 mL SmartBlock AND a ThermoTop and receive 3 boxes of Eppendorf Safe Lock tubes FREE* from the list on page 8.**

NEW Mastercycler® X40

Raise your standard in end point PCR experiments together with the new edition of Mastercycler®X40. Take your PCR amplification to the next level with this highly reproducible, flexible, reliable, and small footprint cyclers. The cycler is also connectable to VisioNize® Lab Suite for real time monitoring and to receive notification in the event of device error and power outage.

Protects your samples from evaporation

SafeLid applies ideal pressure to your PCR consumables.

Consumable flexibility

The aluminum block can be used with 0.1 and 0.2 mL PCR tubes and tubestrips, as well as any kind of 96-well PCR plate (unskirted, semi-skirted and skirted).

7 inch LCD Touchscreen

The sensitive color touchscreen is covered with an easy-to-clean glass surface.

Import and export of protocols

Easy access of USB port on the device front.

Intuitive software

Easy programming and editing of programs with the well-proven user interface of Mastercycler X50.

12-column gradient

Optimise temperature steps in your PCR protocol efficiently by testing 12 different temperatures from column 1 to 12.

For more promotion info on the PCR cycler family, please reach out to your local Eppendorf Territory Manager.

Unlocking Cellular Potential: Eppendorf's Innovative Solutions

Are you in search of cutting-edge cell cultivation devices for microbial cells, mammalian cells, or both? Look no further! Eppendorf offers a comprehensive range of solutions tailored to meet your lab's needs.

Our state-of-the-art incubator shaker, S41i seamlessly integrates cell incubation and shaking functions into a single device. Whether you're nurturing microbial colonies or tending to delicate mammalian cells, Eppendorf has you covered. Imagine the convenience: one instrument, dual capabilities!

The CellXpert® C170i ensures high reproducibility in your experiments. Precise temperature control, optimal gas exchange, and controlled agitation create an ideal environment for cell growth. Contamination risks? Not on our watch! Our designs prioritize sterility and easy cleaning, safeguarding your valuable cultures.

Investing in quality now translates to cost savings in long run. Efficient energy usage and durable components mean you can focus on breakthroughs, not repairs.

Get in contact with your local Eppendorf Territory Manager to discover more on our latest promotion.

A Sustainable Future For You and Your Laboratory

In recent years, our design language and the utility of our products have incorporated elements of sustainability. This sustainable commitment is evident in our recent introduction of conical tubes and pipette tips made from renewable resources. Our carbon footprint-transparent pipettes are verified, and ACT labelled by My Green Lab. ISCC plus certification becomes a standard route that we take to certify our BioBased tubes and tips to be a part of the circular economy that enables traceability along the entire supply chain. The latest innovation in microcentrifuges, the hydrocarbon cooling system, is another important contribution to our green initiatives.

The microliter system would not be complete now without a robust and reliable sample management plan. The barcoded Cryostorage vials are example of how Eppendorf empowers a sustainable and future-proof way of providing safety and traceability in your lab. Covering 5 different volumes and 2 purity grades, there is flexibility to meets different requirements. Naturally, all our consumables can safely be stored in the sustainable ULT Freezers range that are ACT labelled and certified Energy Star compliant, as well as powered by green cooling systems. Our involvement as the Gold sponsor in this year International Laboratory Freezer Challenge coordinated by My Green Lab showed our commitment towards this cause. A secure and responsible future for you and the environment is our commitment through product design and the sustainable practice in the manufacturing of our products.

Looking for best buy on our flagship ULT Freezer, give a ring to your local Eppendorf Territory Manager!

Explore the World of VisioNize

VisioNize® Lab Suite is your solution for effective lab and device management. Gain access to a modular range of services (instrument monitoring, alarm notification, instruments documentation, maintenance management, etc) and decide what works for your lab. These services integrate together to support you and your lab.

The suite of services is kept updated, making it a sustainable investment. As you and your lab expand over time, VisioNize Lab Suite evolves to meet your needs and is designed to empower you to focus on your next breakthrough.
